

## FINISHES

---

The houses of Casas dos Arcos have been designed on the basis of 'sustainable construction', making them exceptionally comfortable, economical and eco-friendly.

Solar heating, double-glazing, thermal insulation and the clever use of grassed coverings over areas of the house, provide for maximum efficiency and energy saving.

Light and spacious, with large windows, ample verandas and the welcoming warmth of natural pine flooring in the living rooms and bedrooms, these luxurious homes offer outstanding levels of comfort and refinement.

### **Features include:**

- Raised floors
  - Thermal and acoustic insulation
  - Solar water heating
  - Double glazed windows with thermally insulated frames
  - Certain areas of the house roofed with energy saving grassed areas.
  - Water / Air mixture taps for water saving
  - Fully fitted kitchens with energy saving appliances
  - Use of eco-friendly paint on interior walls to reduce adverse effects on health and the environment
-
